

kód: U0141TG

4G Datalogger is designed to record temperature from four external Pt1000 probes connected to the terminal board. In case of exceeded set limits, SMS and JSON messages can be sent via 4G data connection. Measured values can be sent to the internet storage [COMET Cloud](#), which is a complete monitoring, alarm and analysis system.

It is also possible to set the regular sending of JSON messages to COMET Database, the sending interval is adjustable. Alarms are also indicated locally by LED, LCD and acoustically by built-in beeper.

The recording is performed in a non-volatile electronic memory. The data can be transferred to a PC via included USB-C cable.

The device **includes Traceable calibration certificate** with declared metrological traceability of etalons is based on requirements of **EN ISO/IEC 17025 standard**.

S novo zakúpeným IoT bezdrôtovým dataloggerom so vstavaným modemom získate 3 mesiace [COMET Cloud](#) zadarmo; celý rok prevádzky v [COMET Cloud](#) potom vyžaduje [1 kredit](#).
